## **Gender Identity, Gender Expression and Sex Characteristics Act**

*Rosario Mizzi*

While I agree with the right of all persons to express their own gender identity and I agree with the state protecting and safeguarding decisions made by persons on their own gender identity, I do not agree that this should involve children and minors bely 14 years. I do not agree that parents should decide for their children at such an early age when sexual development and orientation is still in process. This may psychologically affect the development itself. I think that adolescents should have the right to decide for themselves later on in their life.
