Gender Identity, Gender Expression and Sex Characteristics Act

STP, International Campaign Stop Trans Pathologization

STP, International Campaign Stop Trans Pathologization, supports Malta's Gender Identity, Gender Expression And Sex Characteristics Act. We value this proposal for its many strengths in relation to human rights, and with regards to depathologization we especially support its acknowledgment of the rights to recognition of gender identity, free development of the person according to gender identity, to be treated according to one's gender identity, as well as the rights to bodily integrity and physical autonomy. Furthermore, we endorse this Act for establishing a procedure for legal gender recognition without medical requirements. In conclusion, STP, International Campaign Stop Trans Pathologization recognizes Malta's Gender Identity, Gender Expression and Sex Characteristics Act as promoting the rights of trans and intersex people..
